Summary

AI/ML-focused Software Developer with experience building AI-driven and full-stack applications using Python, Django, and modern web technologies. Skilled in developing LLM-powered systems using Retrieval-Augmented Generation (RAG), semantic search, and agentic AI workflows for intelligent automation. Strong foundation in data structures, backend development, and scalable system design, with a focus on integrating AI models into practical, production-ready applications.

Education

Sri Indu College of Engineering and Technology

Bachelor of Technology – Artificial Intelligence and Machine Learning

Cumulative GPA: 8.54 / 10.00

Telangana, Hyderabad

October 2023 - Present

Internships & Professional Trainings

Full Stack Development Training, *Gradiious*

- Currently developing and enhancing full-stack modules using Java and REST APIs, focusing on scalable design and code reusability.

Telangana, Hyderabad

August 2025 – Present

Cognifyz Technologies, Intern

- Designed and developed responsive UI modules using HTML5, CSS3, and JavaScript.
- Integrated frontend components with backend REST APIs to enable dynamic data flow.

Telangana, Hyderabad

November 2024

Projects

Agentic Game-Builder AI, *Autonomous Game Generation System*

February 2026

Project Lead

- Developed AI agent generating playable HTML5 games from natural language using multi-phase LLM workflows.
- Designed a three-phase agentic system: **clarification** (dynamic Q&A), **planning** (structured JSON specs), and **generation** (HTML/CSS/JS), with no hard-coded templates.
- Dockerized deployment with **Groq API** (Llama 3.3 70B) for reproducible, high-quality game generation.

ThinkAI Knowledge Bot, *AI-Powered Knowledge Assistant*

January 2026 – February 2026

Project Coordinator

- Developed an AI-powered knowledge assistant using **Python**, **LangChain**, and **Groq LLM APIs** with a real-time **Streamlit** interface.
- Implemented semantic search and document retrieval using **FAISS** and Sentence Transformers.
- Integrated external knowledge sources via **DuckDuckGo** and **Wikipedia APIs** for enhanced responses.

Find Helpers, *Full Stack Web Application*

September 2025 – December 2025

Full Stack Developer

- Developed a full-stack web application using **Django** as backend and **REST APIs**.
- Designed an agentic **AI workflow** using LLMs for autonomous query handling and multi-step reasoning.
- Focused on writing clean, efficient, and testable code with attention to performance.

Skills & Interests

Programming Languages: C, C++, Python, Java.

AI/ML: Machine Learning, NLP, Generative AI, RAG, AI Pipelines, Prompt Engineering, LLMs, Crew AI.

Frontend: HTML5, CSS3, JavaScript, Responsive Design, DOM Manipulation.

Backend & Databases: REST API Development, SQL, NoSQL concepts.

Frameworks: Django, Spring Boot (Basics), Tkinter, Postman, VS Code.

Core Concepts: Data Structures & Algorithms, OOP, Problem Solving, DBMS, API Integration.

Awards & Certifications

- IBM** – Artificial Intelligence Fundamentals.
- GeeksforGeeks** – AI Tool - Skill Up, Agentic AI -Skill Up.
- Oracle** - Certified Foundations Associate.
- NPTEL** – Programming in Java (IIT).
